Features ▼

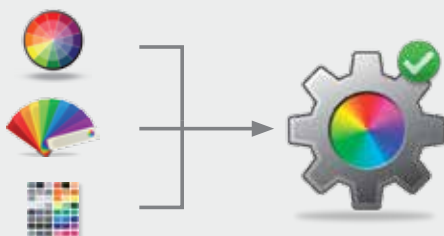

Automate repetitive pre-press tasks

Ex, add bleed, color bars, registration and cut marks, convert fonts to outlines, fix four color blacks, flatten transparencies, resize files, and more.

File repurposing

Automatically modify and optimize files for different printing conditions and technologies.

Centralize color management

Flexible use of ICC profiles, DeviceLinks, and Ink Saving Profiles allows you to tailor your workflows for any need. Manage all of your color from just one window.

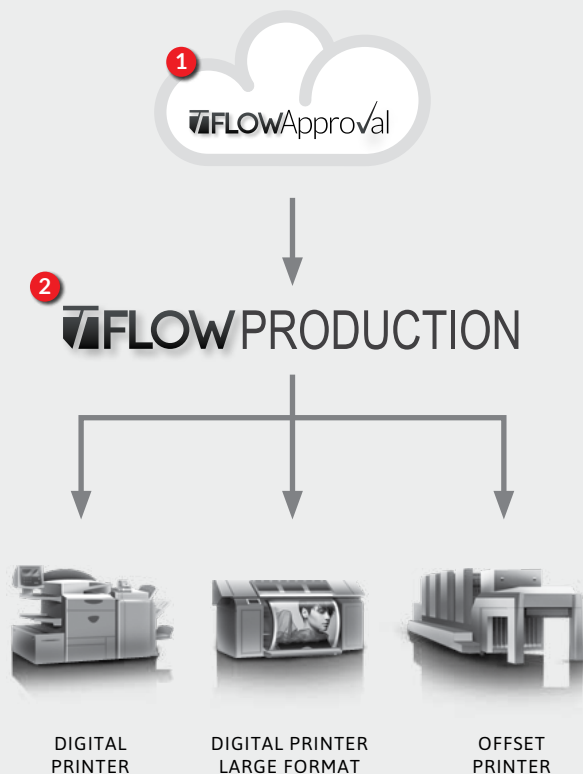

eMail alerts

Detailed information on job states keeps everyone up to date and makes sure no file is left behind.

Automation ▼

Print-ready PDFs

Extend your workflow by connecting tFLOW Production to tFLOW Approval.

1 Approved files are automatically downloaded and processed by tFLOW Production.

2 Jobs are repurposed and distributed to corresponding printers.

tFLOW Production can be used as a standalone system, or connected to tFLOW Approval for fully automated file download and processing.

tFLOW PRODUCTION
